IQF training for Illinois Empower Schools

December 2, 2020
January 12, 2021
8:30am - 12:30pm

All schools that have been designated as lowest or underperforming on the 2020 School Report Card are required to complete the Illinois Quality Framework and Supporting Rubric (IQFSR) and submit a school improvement plan in IWAS by June 30, 2021. In response, the Professional Development Alliance will guide schools through a comprehensive process, T-SIP, to increase equity, close achievement gaps, and meet the requirements of ESSA and the 1003(a) grant.

These half day sessions will cover the fundamental components of the needs assessment as well as the most effective way to complete it to drive your continuous improvement cycle. Participants will leave with an understanding of how to complete the rubric, what data drives the process and how to link the IQFSR to the required school improvement plan due June 30.

***Subsequent sessions on February 18, 2021 and March 9, 2021 will cover all the required components of the School Improvement Report that must be completed by June 30, 2021.
